A few words....

First of all I want to thank you for buying my E-Book. Actually this is my 1st E-book and hopefully not the last one.

What is [ShareCash](#)?

[ShareCash](#) is a site much like Uploading.com as it allows you to upload files and then pays you as you get others to download your files. The difference between [ShareCash](#) and other sites is that [ShareCash](#) will pay A LOT more. [ShareCash](#) pays 300 to 600 dollars for every 1,000 downloads, where Uploading.com pays around 5 dollars for every 1,000 downloads. What I am going to show you right now is how you can grab a hold of [ShareCash](#) and make AT LEAST 50 dollars a day from it! So first if you have not yet done so, [Click here](#)

and [sign up](#) for an account. There is no fee to sign up and it takes a few minutes to do so.

Now you should familiarize yourself with the site so take a good 5 minutes or so to look around. Note the Upload button on the side, that is where you will go to Upload your files.

FEW METHODS TO EARN FROM [SHARECASH](#)

I have spent some serious time developing these methods and making them work. Some are quick and easy and will bring some good cash while others will take more time, but will bring unbelievable cash.

Method-1 (Youtube)

This is an easy way to get started. People will download anything from youtube. So to get started make sure you have an account with youtube. Next go over to daily motion and find a good strip tease video where the girl gets

naked at some point in the video. Download the video from daily motion using www.keepvid.com and fire up windows movie maker. The idea is that we want to post the video up to the point where it becomes obvious that the girl is about to show off some skin (boobs or bottom half) and then we cut the video right there. Now what your going to do is upload the cut portion to youtube. Since there is no actual nudity in this video (since you cut it out) youtube will not take the video down. Upload the entire video to sharecash and put the link in the description box next to your video. Give the video a long sexy name and watch as people download the entire video from your link in order to see the girl naked! Tons of people search for girls on Youtube so your videos will get plenty of views very fast.

Method-2 (Take Help from FORUMs & BLOGs)

Searched the list of Forums and make threads. Try to make threads on approximate 30-40 forums. And another ways is to make you own Blog or Website especially for Sharecash. People just love free stuffs. When you are start getting some decent money from sharecash, just invest in buying a domain and hosting and make website dedicated to downloading free stuffs. SEO it regularly or to improve traffic always do yahoo answers posting along with link back to your website. Just don't punished.

Method-3 (Social Networking Website Like – Orkut, Facebook or Myspace)

Make around 300-400 friends on them. It will take little bit of time but you can do it easily if

you spend around 1 hour daily on that and add around 50 persons a day. Its not so easy but its not even so hard. I got around 500 friends within tw0 weeks.

Most important thing: Concentrate only of UK, US and Canada people because sharecash only pays for these countries signups. It would be much easier for you if you join US and UK communities. If you are comfortable then try to make your profile by a girl's name. Mostly pe add a girl more commonly than a guy.

After creating a ID with 400-500 friends. Add your uploaded pic in your profile or update status.

For example:

Create a notepad file. Clock it with your sharecash link and add in your profile.

Encourage peoples to download your file by saying that this is your phone number, coolest or sexiest pic of yours, or be wilder like this is

my nude cam show download it. There will be many guys there to download your stuff.

Method-4 (Going green with white! –Porn-)

Upload some porn passwords: Go to 4chan.org, look for the random section. There you'll see someone advertising about porn passwords for sure. Download the passwords, rehash them a ebit, b references of a site called something like:

Uniquepornpasswords.com while your site is: hardcorepornpasswords.com (don' exist...)

Now you're going to advertise you warez forums and make forum posts with compelling titles. You have to attract attention to attract downloads, we are going to talk about how your cat named Pete just got ran over by a bloody truck. No, you're going to tell them that you have pretty cool stuff right now, what about you have uploaded, right? You could also link to your

weblog with daily free rapidshare premium accounts while nonsense. Just jot down a few fake rapidshare accounts and when people write stuff like: "Omgz, doesn't work" you have to wait for tomorrow. Or you could give them another file to download, and disappoint them again. It's to think doesn't about others. You're here to think about mentioned above, the one who shares kiddi harmed kids too right? He thinks about himself, and nobody else than himself either.

Method-5 (Torrents)

If you know where to download compelling content then it is a good idea to share your stuff on torrent sites. Preferably public trackers, as private trackers have mostly too much rules and require you to separately make a torrent for each and every file while public or whether the file has multiple

trackers spread over multiple networks. You could either go for a read me file mentioning your sharecash blog or you could go for uploading password protected files or in order for downloaders to unlock your content have them download your sharecash file. If your content is great I download the password. Especial downloading several GB.

METHOD-6 (Virtual Mobile Phone)

Share cash will pay u \$4 if u download using mobile survey

step 1 :-> So u need virtual mobile phone member that can receive sms here is the Guide how u will get virtual mobile number
